NGUYEN PHU Y
FRONTEND DEVELOPER

(+84) 366515120 · ynguyen0101 · nguyenphuyfgw@gmail.com

EDUCATION

University of Greenwich   **Sep, 2020 - July, 2024**

Bachelor of Software Engineering
GPA**:** 3.2/4

TECHNICAL SKILLS

Techstack: React/ReduxJS, Redux Toolkit Query, Tanstack/React Query, Docker, TypeScript, Vite, Nginx, NextJS, Shadcn/ui, Wordpress, TailwindCSS, React-i18next, Ant Design, React Flowbite

PROFESSIONAL WORK EXPERIENCE

Junior Frontend Developer
WALA ICT   **July 2024 - Present**

Project: STEKShield CRM

Tech stack: React/ReduxJS, RTK Query, TypeScript, TailwindCSS, Ant Design, i18n, React Hook Form
Description:
- Developed a business tools platform with React, TypeScript, and Redux Toolkit Query, optimizing workflows and performance by 20%.
- Conducted code reviews and refactored components to ensure maintainability and scalability.
- Built reusable custom hooks and services to separate business logic from UI components
- Worked closely with backend developers using Spring Boot to build a scalable RESTful API

Project: Thinkware CMS

Tech stack: React/ReduxJS, RTK Query, TypeScript, TailwindCSS, Ant Design, i18n, React Hook Form
Description:
- Designed a scalable, user-friendly interface for managing smart trash bins.
- Used Redux Toolkit Query for optimized state management and data fetching.
- Collaborated with cross-functional teams to define requirements, deploy features, and ensure cross-browser compatibility.

Project: Hyundai Bring & T CMS

Tech stack: React, Tan Stack/React Query, TypeScript, TailwindCSS, Ant Design
Description:
- Developed and maintained a CMS for Hyundai's Bring & T services, enhancing vehicle data management.
- Implemented dynamic dashboards with React and React Query for real-time data updates, improving decision-making for administrators.

Project: Prenex AI Landing Page & CMS

Tech stack: React, Tan Stack/React Query, TypeScript, TailwindCSS, Ant Design
Description:
- Implemented a custom CMS to manage dynamic content and improve client experience.
- Set up CI/CD pipelines with GitLab CI for automated deployment to production using Docker and Nginx.

Trainee Backend Developer   **April, 2024 - July 2024**
NASHTECH: GLOBAL TECHNOLOGY CONSULTING SERVICES

Asset Management

Frontend: NextJS, TailwindCSS, Shadcn, JavaScript, Zod
Description:
- Automated asset lifecycle workflows, reducing manual effort and improving operational efficiency.
- Enhanced application performance, achieving faster load times and better data handling for large asset inventories.
- Collaborated with back-end teams to ensure smooth data transmission and system scalability.
